VEHICLE OVERVIEW

This 2005 R-Vision Trail Cruiser has everything a family would need to enjoy their next adventure. This 5th wheel is well made and well cared for with a welded aluminum frame and laminate construction giving it superior strength, lighter weight, and exceptional durability. The fiberglass exterior skin is easy to maintain and is resistant to scratches, dents, and dings. The one-piece steel chassis and aerodynamic front profile make for less wind buffeting and a stronger more stable towing experience. Additional features include a rubber roof for durability and quietness, Roto-cast holding tanks that are seamless and light-weight, along with an easy access utility radius storage door for all your camping accessories.

The galley of the R-Vision Trail Cruiser boasts a flush-mount Dometic refrigerator, 3-burner range top, lighted power range hood, laminate countertops, and double-bowl kitchen sink. Guests can sleep comfortably on a jackknife sofa and 5" reversible dinette and bunk cushions in the dinette booth. The galley also features a large window with miniblinds/hard valances and radius tinted windows, no wax vinyl flooring, and mortise and tenon solid wood cabinet doors.

In the bathroom you'll find an ABS tub surround with adjustable shower head, shower curtain with tieback, Thetford toilet, medicine cabinet w/mirror, wall-mounted light switch, and power roof vent. Convenience and priority are evident with features such as electric jacks with break-a-way switch, fire extinguisher, smoke detector, LP detector, ground fault protected circuits, dead bolt door lock, screen door on entry, triple entry step, a patio light w/amber lens, and a 15' flush-mounted front window awning.

Water capacity includes a 6 gal gas water heater, demand water pump, and color coded water lines. Capacities include a 30 gal fresh water, 40 gal grey, and 40 gal black. Electrical features include 120V GFI protected circuits, 10V breaker panel, outside 120V receptacle, 30 amp 28' detachable power cord, and a 55 amp converter w/charger. Additional specs include a 20,000 BTU furnace, 13,500 BTU air conditioner, copper LP gas lines, 20" LP tanks with cover, 10" electric brakes, all wheel Torsion bar rubberized independent suspension system, and EZ lube hubs. Total dry weight: 5555 Tires ODOT: 0613 and 0513
